SUMMARY

As a Front-end Web Developer since October 2022 at FPT Information System, I bring valuable experience gained during my 3-month internship at Pizitech Ltd . Actively seeking new challenges, I am confident in my ability to excel in any assigned tasks. If you have openings for a Front-end Web Developer, I would love to discuss how my skills can contribute to your team. Please reach out if you have any suitable opportunities.

EDUCATION

University of Economics and Finance

Sep 2018 - Sep 2022

Major: Information Technology

GPA: 3.24/4

WORK EXPERIENCE

FPT Information System

Oct 2022 - Now

Front-End Web Developer

- Developed responsive and user-friendly interfaces using ReactJs.
- Implemented and maintained web applications using React, resulting in improvement in user engagement.
- Collaborated with cross-functional teams to ensure seamless integration of front-end components.
- Participated in code reviews, providing valuable insights and feedback to enhance code quality.
- Conducted code reviews and provided mentorship to front-end fresher developers.
- Actively participated in continuous learning, attending workshops on the latest front-end technologies.

Pizitech Ltd Company

Apr 2022 - Jul 2022

Front End Web Intern

- Based on the Figma design convert to HTML, CSS, and Javascript.
 - Research ReactJs and do some mini projects.
- Achievements and skills gained:
- Improve Team Work and research documents.

SKILLS

Language

English, Vietnamese

FrontEnd

Html, css / scss / Less, tailwindcss, Ant Design, Zustand, Redux-toolkit, Javascript/Typescript. Research new technologies.

ReactJs

React Hooks, React query

PROJECTS

EVN

(Dec 2023 - present)

Customer	EVN
Description	This is a website with key functionalities such as user management, account management, resource management, work management, configuration of categories, and application versioning.
Team size	15
My position	Front-End Web Developer
My responsibilities	<ul style="list-style-type: none">• Front-End Development: Developed reusable components and ensured consistent design across the application, fixing the errors that occurred during development.• Collaboration with Design and Product Teams: Worked closely with UI/UX designers and Business Analysts to align the user interface with the project's vision and requirements. Attended planning sessions and design reviews to ensure a cohesive approach.• Data Integration and API Consumption: Integrated data from RESTful APIs into front-end components. Ensured smooth data flow and real-time updates where required.• Performance Optimization: Enhanced application performance by specific optimization techniques using code splitting, lazy loading, and minification. Conducted performance profiling to identify and resolve bottlenecks.• Version Control: Utilized Gitlab for version control, ensuring code quality and consistency through code reviews.
Technologies used	- ReactJS, React query, Typescript, dayjs, axios, Zustand, lodash, Ant design, tailwindcss.

eTrip phase 3

(Oct 2023 - Nov 2023)

Customer	FPT Information System
Description	This is a website for managing company employee business trips, including expenses, approval tickets, and charts.
Team size	12
My position	Front-End Web Developer
My responsibilities	<ul style="list-style-type: none">• Front-End Development: Developed reusable components and ensured consistent design across the application, fixing the errors that occurred during development.• Collaboration with Design and Product Teams: Worked closely with UI/UX designers and Business Analysts to align the user interface with the project's vision and requirements. Attended planning sessions and design reviews to ensure a cohesive approach.• Data Integration and API Consumption: Integrated data from RESTful APIs into front-end components. Ensured smooth data flow and real-time updates where required.• Performance Optimization: Enhanced application performance by specific optimization techniques using code splitting, lazy loading, and minification. Conducted performance profiling to identify and resolve bottlenecks.• Version Control: Utilized Gitlab for version control, ensuring code quality and consistency through code reviews.
Technologies used	ReactJS,React query, Typescript, dayjs, axios, Zustand, lodash, Ant design, tailwindcss.

Admin portal

(Sep 2023 - Sep 2023)

Customer	FPT Information System
----------	------------------------

Description	This is the web app for configuring settings for an e-commerce platform and its associated mobile application
Team size	4
My position	Front-End Web Developer
My responsibilities	<ul style="list-style-type: none"> • Front-End Development: Developed reusable components and ensured consistent design across the application, fixing the errors that occurred during development. • Collaboration with Design and Product Teams: Worked closely with UI/UX designers and Business Analysts to align the user interface with the project's vision and requirements.
